Large playground

Gym

End of the Summer Talent show

To name a few!!!

## **RACCOON (current k4 students)**

This summer the Raccoon Room will be traveling around the world. We'll be exploring the different continents, "stopping" at various countries around the world. At each stop we'll listen to the music of the region, taste some of the foods, read some stories, and try our hand at a few art projects. Along the way we'll learn some geography, some history, and expand our knowledge of the world we live on and our understanding of and tolerance for others who are different from us.

## **OWLS (current k5-1st grade)**

This summer the Owl Room will take a trip through the solar system, making a stop to explore each planet. We will be going to the UWM Planetarium and creating planets in our classroom. We will then voyage back in time to ancient Egypt to learn about the Pharaohs and pyramids.

Along with the above "trips" we will be reading, analyzing and story mapping several chapter books. We will learn about many unique artists as well as trying out different art techniques. We will display our art work throughout the summer.

Throughout the summer we will emphasize healthy lifestyles, focusing on healthy food choices and exercise. Sprinkler fun, outdoor games as well as great fieldtrips will round out our days!

## **WOLVES (current 2nd -6th grade)**

This summer the Wolves will be exploring many different themes to go along with our wide variety of field trips. In June we will be focusing mostly on our environment and being "green" In July we will be concentrating on science and art with bigger projects and a circus party. We will be practicing for our talent show in August by choreographing dances and developing different talents. In August we will also be focusing on different sports, "tailgating" at Miller Park and going on our big family field trip to Great America. To bring our summer to an end we will be making "Back to School" supplies for our lockers.

**GLENDALE HEIGHTS  
LOCATED IN
